

NISHANTH VEDURUVADA

Principal AI & Security Architect

Agentic AI • Enterprise AI Modernization • AI Governance • Zero Trust Architecture

Hyderabad, India | +91 9010244874 | nishanth.themaster@gmail.com | linkedin.com/in/nish-ved

EXECUTIVE PROFILE

Principal Architect with 10+ years of experience designing and leading enterprise-scale AI, Security, and Governance initiatives. Currently serving as AI Engineer Advisor at NTT DATA, leading architecture and delivery of AI modernization programs across global client portfolios. Expertise spans Agentic AI, Multi-Agent Systems, FastMCP, MCP, A2A communication frameworks, RAG, AI Governance, Machine Learning, and Zero Trust Architecture. Published researcher and co-inventor of a registered intellectual property focused on secure insurance data management.

CORE EXPERTISE

Agentic AI: CrewAI, LangGraph, AutoGen, LangChain, Multi-Agent Systems, Human-in-the-Loop

Enterprise AI: RAG, Vector Databases, ChromaDB, Knowledge Systems, Conversational AI

Agent Protocols: FastMCP, MCP, A2A Protocols, Tool Calling, Agent Governance

AI Platforms: Azure OpenAI, OpenAI, Claude, Ollama, Vertex AI

Security: Zero Trust, NIST 800-207, IAM, ZTNA, SASE, DLP, API Security

Engineering: Python, FastAPI, Docker, Kubernetes, CI/CD

PROFESSIONAL EXPERIENCE

NTT DATA – AI Engineer Advisor | Dec 2025 – Present

Lead architecture and technical governance for 8–10 enterprise AI modernization programs, managing a multidisciplinary team of AI Engineers, Senior Engineers, and Data Scientists delivering Agentic AI, RAG, conversational intelligence, and predictive analytics solutions supporting platforms serving approximately 2 million users.

- Define enterprise AI architecture standards and governance frameworks.
- Architect AI-native capabilities for modernization of legacy enterprise applications.
- Design multi-agent architectures using CrewAI, LangGraph, FastMCP, MCP, and A2A communication patterns.
- Build enterprise conversational systems and knowledge assistants over legacy platforms.
- Design MCP-based integration frameworks, tool orchestration models, and agent governance controls.
- Architect RAG platforms integrating enterprise knowledge repositories and contextual reasoning.
- Lead predictive analytics and machine learning initiatives for forecasting and operational intelligence.
- Drive architecture reviews, stakeholder alignment, technical strategy, and mentoring.

LEVO.AI – AI Enterprise Architect | Jan 2025 – Dec 2025

Client: Insurance Information Bureau of India (IIB)

- Designed AI Trust Fabric architecture integrating governance, explainability, and adaptive trust.
- Developed multi-agent orchestration solutions using CrewAI and LangGraph.
- Architected RAG-based policy intelligence and compliance platforms.
- Built offline AI capabilities using Ollama integrated with enterprise workflows.
- Designed MCP-enabled API intelligence and automation solutions.
- Established AI governance controls for secure enterprise AI adoption.

Insurance Information Bureau of India (Client Engagement)

Architected enterprise Zero Trust Architecture for a national-scale insurance ecosystem including:

- PAP, PDP, PEP and PIP architecture design.
- Adaptive Trust Engine and dynamic trust scoring models.
- Microsoft Entra ID, MFA, ZTNA, IAM integration.
- API Security, Data Security, Kubernetes workload security and compliance controls.
- Trust Fabric concepts combining Zero Trust, governance, and adaptive access control.
- AI-powered compliance and policy enforcement frameworks.

Arcstream Technologies – Technical Security Lead | Aug 2022 – Jan 2025

Led enterprise security modernization initiatives including Zero Trust segmentation, SASE migration for 5,000+ users, CI/CD security hardening, and architecture governance.

Reezanorp Technologies – Senior Software Engineer | Dec 2016 – Jul 2022

Built machine learning, analytics, computer vision, ETL, and enterprise automation solutions using Python and modern data engineering frameworks.

SELECTED ARCHITECTURE INITIATIVES

Enterprise AI Modernization

Architecting AI transformation across global enterprise products through Agentic AI, conversational interfaces, intelligent workflow automation, and predictive analytics.

Enterprise Agentic AI Platform

Designed reusable multi-agent architecture supporting agent collaboration, MCP integrations, A2A communication, governance controls, and enterprise tool orchestration.

AI Trust Fabric

Created a framework integrating AI Governance, Zero Trust principles, adaptive access control, explainability, and compliance monitoring.

MCP Guardian

Security framework extending MCP ecosystems through authentication, rate limiting, governance, auditability, and threat mitigation.

PUBLICATIONS & INTELLECTUAL PROPERTY

MCP Guardian: A Security-First Layer for Safeguarding MCP-Based AI Systems

Published in Computer Science & Information Technology (CS & IT), Vol.15 No.9, 2025.

Building the Trust Fabric: Reinventing National-Scale Insurance Security in the AI Era

Research in Progress.

Secure Insurance Data Management Device

Registered Design No. 485611-001 (Government of India). Lead architect and co-inventor of a secure insurance data management architecture incorporating Zero Trust principles, adaptive trust evaluation, identity-centric controls, and secure data access mechanisms.

LEADERSHIP

- Team Leadership (8 Engineers)
- Architecture Governance
- Enterprise AI Strategy
- Stakeholder Management
- Technical Mentoring
- AI Transformation Programs

EDUCATION

Bachelor of Technology (Electronics & Communication Engineering) – Jawaharlal Nehru Technological University
